EDUCATION

UNIVERSITY OF MUMBAI

BE IN MECHANICAL

May 2019 | Mumbai

Cum. GPA: 6.83 / 10.00

UNIVERSITY OF MUMBAI

HSC May 2015 | Maharashtra, India

UNIVERSITY OF MUMBAI

SSC May 2013 | Maharashtra, India

COURSEWORK

GRADUATE

BE Mechanical Engineering

Front End Web Development

Back End Web Development

Full Stack Web Development

UNDERGRADUATE

Information Retrieval

Operating Systems

Artificial Intelligence

Functional Programming

SKILLS

MECHANICAL & DESIGN

Core Expertise

AutoCAD • SolidWorks • CATIA

GAD Layouts • Clearance Optimization

Sheet Metal Fabrication • GD&T

CADCAM • CAMPath

PROGRAMMING

Over 5000 lines:

Java • Python • JavaScript

SOFT SKILLS

Problem Solving • Decision Making •

Team Leadership

EXPERIENCE

ORBIS ELEVATOR | DESIGN ENGINEER

Sep 2024 - Present | Ahmedabad, GJ

- Engineered comprehensive 2D Elevator development and General Arrangement Drawings (GADs) elevator systems using AutoCAD, ensuring precise alignment with civil blueprints.
- Modeled high-precision 3D components, full-scale car frames, slings, and counterweight assemblies in SolidWorks using advanced sheet metal and weldment modules.
- Conducted structural and clearance analysis on 3D elevator car frame designs to ensure mechanical integrity, smooth vertical transit, and zero-clash operation.
- Optimized 2D hoistway, pit, and machine room spatial layouts in AutoCAD, reducing structural interference and cutting on-site installation rework by 15%.
- Developed standardized 2D drafting templates for rail bracket positioning and elevator entrance details to accelerate engineering sign-offs.
- Collaborated directly with civil engineers, architects, and assembly teams to verify shaft dimensions and standardize modular cabin configurations.

LOTUS ENGINEERING | DESIGN ENGINEER

Aug 2023 - Sep 2024 | Ahmedabad, GJ

- Designed and developed sheet metal parts for printing machines and industrial controllers, ensuring high precision and durability.
- Created 2D and 3D CAD models and detailed fabrication drawings using SolidWorks and AutoCAD.
- Optimized sheet metal designs for manufacturability, reducing production time and material costs by 30 percent.
- Implemented design changes and continuous improvements based on feedback from assembly and field operations.

HVAX TECHNOLOGIES | DESIGN ENGINEER, PRODUCTION SUPERVISOR & EXPORT EXECUTIVE

Jan 2019 - April 2023 | Thane, Mumbai

- Designed and developed customized Air Handling Units (AHUs) and pharmaceutical equipment to meet client-specific HVAC and cleanroom requirements.
- Created detailed 2D fabrication drawings and 3D models of AHUs, sheet metal enclosures, and pharmaceutical machinery using AutoCAD and SolidWorks.
- Coordinated closely with the production team to ensure smooth manufacturing, assembly, and timely delivery of projects.
- Assisted in preparing export documentation, product certifications, and technical datasheets to meet global compliance requirements.
- Coordinated export packaging of AHUs and pharmaceutical machines to ensure safe international shipping, following ISPM 15 and client-specific packaging standards.
- Supported the logistics team in arranging shipments, creating packing lists, and assisting with customs clearance documentation.
- Handled third-party inspections (TPI) for export orders, ensuring product compliance with international quality standards before dispatch.
